EY Campus Recruitment
Toronto, Ontario

2027 Consulting - Canada - Full-Time Staff (1734991)
Technology Consulting - SAP and Oracle Platforms, Toronto

Dear EY Recruitment Team,

I am applying to the SAP and Oracle Platforms team in Toronto for September 2027. I am completing a Bachelor of Information in Information Systems at the University of Toronto, with graduation expected in June 2027. My work as a Business Intelligence Analyst co-op at Vale has shown me how enterprise systems, clear requirements and practical automation can improve daily operations. I want to build on that experience in SAP consulting.

At Vale, I automated five daily SAP and Excel processes using VBA, SAP scripting and Power Automate, reducing manual processing time by up to 60% for four teams. I also added data-validation checks to reduce entry errors. This work has taught me to understand the business task, identify repetitive steps and check the reliability of a solution before relying on it.

I also translated interviews with six Sales Managers into technical requirements for Microsoft Dynamics 365 CRM, triaging more than ten workflow issues and working with IT on improvements. I built three Power BI solutions that combine SAP and Excel data for cost, budget, freight and purchasing decisions. These experiences connect technical work to stakeholder needs and have strengthened my interest in consulting on enterprise platforms.

I would bring an analytical approach, experience communicating with business users, and a willingness to learn from implementation teams. I am particularly interested in EY's SAP and Oracle Platforms stream because it would let me develop deeper enterprise-system skills while helping clients improve their processes. Thank you for considering my application.

Sincerely,
Justin Dao
