EDUCATION

University of Toronto — Expected June 2027
Bachelor of Information in Information Systems | GPA: 3.7/4.0 — Toronto, ON

- Scholarships: University of Toronto Admission Scholarship ($1,000); CIE International Experience Award ($4,000)

EXPERIENCE

Vale Base Metals — May 2026 – Present
Business Intelligence Analyst Co-op Student — Toronto, ON

- Built an Excel/VBA and SAP scripting tool for sales-order entry with contract autofill, input checks and batch processing; reported benchmark: ~3 minutes to 30 seconds per order.
- Mapped the commercial lifecycle from forecasting and sales through inventory, logistics, customer handoff and post-customer work; translated the process into an interactive HTML/CSS/JavaScript guide with decision paths and linked procedures.
- Turned interviews with 6 Sales Managers into Dynamics 365 CRM requirements and triaged 10+ workflow issues with engineers to reduce duplicate entry and sales-process friction.
- Designed SharePoint governance and organization/distribution-list prototypes in HTML/CSS, clarifying ownership, access rules and team membership for internal users.
- Defined scope and launch readiness for an AI knowledge-assistant pilot by mapping ~1,655 content items, logging 62 sources and prioritizing 21 pre-pilot issues.

Apple — May 2024 – January 2025
Product Specialist — Vancouver, BC

- Matched customer needs and technical requirements to the right products, contributing $500K+ in quarterly revenue and ranking in the top 10% of Specialists.
- Used sales KPIs and customer conversations to refine recommendations, lifting conversion by 20%, and resolved product and service issues directly with customers.

TMA Solutions — May 2023 – August 2023
UX/UI Design Intern — Ho Chi Minh City, Vietnam

- Ran 12 user interviews and built 3 journey maps, turning 10+ pain points into 6 prioritized design recommendations and 15+ wireframes.
- Partnered with 5 engineers and stakeholders to fix 8 usability issues from 3 test rounds with 10+ users, cutting a booking flow from 9 to 6 steps and raising task completion by 25%.

PRODUCT PROJECTS

Instacart Grocery Recommendations | Python, SQL | Case study — October 2026

- Scoped and prototyped a Buy it again recommender on 3.4M orders from 131K shoppers, finding 24% of each next basket in offline tests and 5× a best-seller baseline.
- Compared ML models with simple rules and chose a lower-complexity rule because the models added under 1%.

SkillSwap – Hobby Supply Swapping App | Figma, Claude | Case study — January 2026 – April 2026

- Surveyed 42 people, interviewed 7 and tested a marketplace prototype with 12 users, scoring 71.7/100 on usability; redesigned listing, buying and offer flows around observed friction.
- Built the redesign as a working AI-assisted prototype, taking it from research and service blueprinting to a hands-on product experience.

TStar – Student Friendship App | Figma, UX Research | Case study — October 2025 – December 2025

- Surveyed 31 students and interviewed 11 to design an app that helps shy students make friends in their program.
- Tested 2 rounds with 6 students, then fixed the 5 issues they hit in the final prototype.

SKILLS

Product & Design | Product discovery, problem framing, process mapping, prioritization, requirements, stakeholder interviews, UX research, usability testing, journey mapping, interaction design

Building | HTML/CSS/JavaScript, AI-assisted prototyping (Claude, Codex), Figma, Python, SQL, GitHub

Systems & Data | Excel, VBA, SAP, Power Automate, Dynamics 365 CRM, SharePoint, Power Query
